11 I'm opposed to storing nuclear waste at Yucca
12 Mountain. This is a growing part of Nevada and also
13 growing part of Southern California. It's highly
14 populated and I think it's very dangerous. I think the
15 shipment of nuclear waste is dangerous. And I think
16 that, again, that the states who choose to use nuclear
17 power should be responsible for the storage and
18 containment of the waste that's generated.
